

LT700H

Rugged RTK Tablet

Make your work more efficient

Hardware Description

LT700H Rugged Android RTK Tablet

The LT700H GNSS RTK tablet is the ideal companion designed to increase efficiency and productivity of mobile field work force in different industries and applications requiring centimeter to decimeter accuracy positioning. Rugged and lightweight, the LT700H is a versatile Android-based tablet for precision GIS data collection, forensic mapping, construction layout, environmental surveys...

Connecting the LT700H to RTK network correction services (NTRIP) produces survey-grade positioning solution within seconds through its built-in dual frequency full constellation GNSS module. Besides its full compatibility with CHCNAV LandStar 7 Survey Software, the LT700H enables accurate positioning to any existing Android survey, mapping and GIS software.

Featuring an 8-inch sunlight-viewable screen, the LT700H perfectly displays any GIS data tables, complex vector and raster maps or high-resolution pictures. Unlike consumer-grade tablets, the LT700H industrial IP67 design withstands all-day use in harsh environments and conditions. Protected from dust, rain, extreme temperatures as well as accidental drops from 1.5 m, the LT700H always keeps your data secure.
